

TPC Series All-in-One LCD Display PC

70" Widescreen All-in-One LCD Display PC
with Optional Touchscreen

(Model: TPC7000)

The TPC7000 includes a high-performance PC integrated behind a 70" commercial-grade active matrix LCD display with full 1920 x 1080 resolution. This built-in computing power is highly customizable, providing maximum flexibility in choosing the right components for your applications. Whether you need a digital whiteboard, consumer engagement or a large format interactive application, TPCs are built to your exact specifications, and can be configured to meet the requirements of any software application.

The optional built-in touch screen adds another level of functionality to your TPCs. The TPC7000 with Touch Screen is perfect for interactive applications, hands-on training and simulation software or coupled with Hitachi® Starboard™ Digital Annotation Software Suite to create a complete digital whiteboard system. Adding a PTZ Camera and VTC software enables the TPC7000 software to replace all the technology of a traditional conference room in one efficient, easy-to-install system.
